VOCATIONAL EDUCATION, A MESSAGE FROM BUSINESS. BY- MCGOWAN, WILLIAM N.

PUB DATE AUG 65

EDRS PRICE MF-\$0.25 HC-\$1.68 40P.

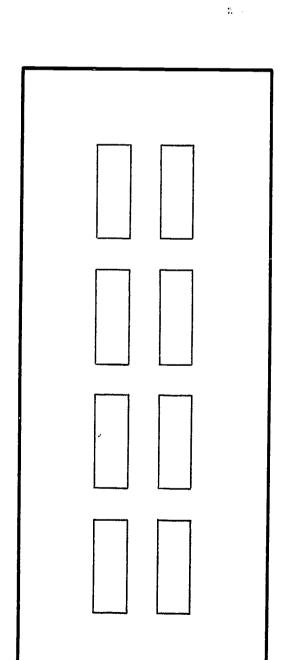

DESCRIPTORS- \*OCCUPATIONAL SURVEYS, \*EMPLOYMENT OPPORTUNITIES, \*EMPLOYMENT QUALIFICATIONS, EMPLOYER ATTITUDES, \*EDUCATIONAL NEEDS, JOB APPLICATION, \*VOCATIONAL EDUCATION, INTERVIEWS, QUESTIONNAIRES, EDUCATIONAL IMPROVEMENT, CALIFORNIA,

A DISCUSSION BY INDUSTRY AND BUSINESS LEADERS AND EDUCATORS ON ESTABLISHING MORE MEANINGFUL RELATIONSHIPS BETWEEN BUSINESS, INDUSTRY, AND THE PUBLIC SCHOOLS PROMPTED A SURVEY OF NINE MAJOR EMPLOYERS IN CALIFORNIA TO GATHER DATA CONCERNING ENTRY LEVEL JOBS FOR WHICH IT WAS DIFFICULT TO FIND EMPLOYEES, THE GENERAL NATURE OF JOB INTERVIEW QUESTIONS, A FORECAST OF JOB NEEDS, AND OPINIONS CONCERNING THE KIND OF PREPARATION SCHOOLS SHOULD BE GIVING STUDENTS TO IMPROVE THEIR QUALIFICATIONS AS POTENTIAL EMPLOYEES. DURING THE YEAR ENDING JUNE 1964, KAISER STEEL CORPORATION PROCESSED 10,661 JOB APPLICANTS BUT HIRED 2,392, LOCKHEED-CALIFORNIA PROCESSED 18,296 BUT HIRED 3,944, AND PACIFIC TELEPHONE COMPANY PROCESSED 200,000 BUT HIRED 18,000. THE MAJOR REASONS FOR REJECTING APPLICANTS WERE THEIR FAILURE TO MEET EDUCATIONAL REQUIREMENTS, THEIR FAILURE TO MEET MINIMUM COMPANY TEST REQUIREMENTS, AND THEIR LACK OF SKILL OR EXPERIENCE. JOBS FOR WHICH IT WAS DIFFICULT TO FIND EMPLOYEES INCLUDED ACCOUNTANT, BOILERMAKER, BUILDING SERVICE MAN, DRAFTSMAN, ELECTRICIAN, PROGRAMER, STENOGRAPHER, AND WELDER. PREPARATION WHICH SCHOOLS SHOULD BE GIVING INCLUDED TRAINING IN SECRETARIAL AND CLERICAL SUBJECTS, ARITHMETIC, GRAMMAR, SPELLING, OFFICE CONDUCT, HUMAN RELATIONS: JOB APPLICATION, AND ANALYTICAL PROBLEM SOLVING. SUGGESTIONS FOR IMPROVING VOCATIONAL EDUCATION THROUGH EFFECTIVE INVOLVEMENT OF BUSINESS, INDUSTRY, AND SCHOOLS CONCERNED SETTING UP CENTRAL CLEARINGHOUSES FOR VOCATIONAL GUIDANCE MATERIALS, FEDERAL GOVERNMENT IMPLEMENTED PLANS OF JOB, REPRESENTATIVE VISITS TO SCHOOLS ON A CONTINUING BASIS, AND A VOCATIONAL EDUCATION COUNCIL FOR EACH COUNTY CONSISTING OF REPRESENTATIVES FROM FORMS AND PERSONNEL INTERVIEWER EVALUATION FORMS ARE GIVEN IN THE APPENDIX. ### INTRODUCTION AND BACKGROUND

There's a small mechanical brain available about the size of a portable typewriter that can do in one hour what fifty men with modern desk calculators would normally take a year to achieve.

Boxes are now made automatically by a machine that produces thirteen boxes a minute from a pile of boards and a barrel of nails. It also makes crates, and frames for a bed's box springs. It can do everything but join the union!

An automatic bread-making machine mixes dough, shapes and cuts it, and feeds the loaves into an automatic oven. As the loaves emerge from the oven, an automatic machine slices and wraps them. No bakers needed! Only mechanics!

More than ninety per cent of the glass bulbs for the electric lights in the United States, above flash-light size, and for all radio and T/V tubes (except the picture tube) are turned out by only fourteen machines. Each machine, operated by one man, blows bulbs faster than a machinegun can shoot bullets - eighteen hundred per minute! The machines work so fast they can't be kept busy. In their spare time they make Christmas tree ornaments, and they still don't have enough to do!

The world of work is changing almost faster than our ability to make adjustments for the changes taking place, and training for vocations becomes an almost impossible task. Training in basic skills must adjust to meet new needs, and one of the fundamental criteria for this training is an ability to adjust to change itself, whatever it may be. This demands the training of a flexible mind, a flexible attitude, and flexible abilities that can progress easily from one way of doing things to another and different way.

Advancing technology is having startling effects on all our vocations—on our methods of practicing medicine, handling communications, manufacturing all sorts of things, even the construction of houses. To—morrow's homes may be of plastic, steel or aluminum, have removable walls, light diffusing partitions, structural furniture and self—contained utilities such as dry-cleaning units to supplement garbage disposals, dish-washers, and automatic washing-machine-dryers.

Vocations evolution is bringing about much more change than just that associated with the creation of new jobs, new ways of doing things. It is bringing about a whole shift of emphasis upon types of work made necessary by a changing world. A brief decade ago agricultural work still pre-empted the services of the majority of the labor force. Today, jobs in the "services" classification employ more workers than any other category. Other strange shifts in occupation are occurring.

One out of every forty-four working Americans now earns his living in the fine arts of painting, sculpture, music, drama, and architecture.

More Americans now earn a living in music than in the professions of law, medicine, dentistry, and the ministry combined.

What tremendous implications all this has for education, particularly those aspects dealing with vocational education! The real problem lies in the fact that many people, perhaps even a majority (and certainly many influential educators!) fail to appreciate or understand what's happening. The whole emphasis in education since Sputnik pierced the heavens in 1957 has been upon math and science, upon the so-called academic aspect of education. This emphasis has created an imbalance in curriculum, particularly at the level of the secondary school, between the "academic" and "non-academic" or "vocational" courses of study. The world needs scientists, engineers, doctors, lawyers, but more, it needs skilled technicians, lab assistants, technically trained sales personnel, artists, musicians, and a multitude of semi-professional workers that constitute the major portion of today's labor market.

Fortunately, some of the nation's leaders have recognized the need for emphasizing vocational education at the secondary school level, and movements are under way to do something about the situation.

President John F. Kennedy recognized the implications of a changing world for vocational education. One month after he took office, he requested the Secretary of Health, Education, and Welfare to appoint an advisory body "to be charged with the responsibility of reviewing and evaluating the current National Vocational Education Act, and making recommendations for improving and redirecting the program."

A panel of consultants was established consisting of representatives from the fields of education, industry, labor, agriculture, and government. This panel suggested the replacement of existing vocational education programs with a program that would do these things:

- 1. Augment Federal funds now being given to support vocational education at the high school level.
- Establish a three-year experimental program to devise pilot projects which would serve potential high school drop-outs and offer them appropriate individual vocational guidance.
- 3. Provide financial aid for assisting in the training of subprofessionals by making Federal funds available for construction of facilities as well as for instruction, administration, and the purchase of equipment for these programs.
- 4. Expand already established programs for retraining and upgrading skills of both employed and unemployed persons.

<sup>1</sup> President's Message to Congress on American Education, Feb. 20, 1961.

5. Provide support for specific services which would improve vocational education, such as: training of vocational teachers, development of new curricula and instructional materials, research to help evaluate the effectiveness of vocational education, provide consultative services through state and local vocational education agencies.

Annual Federal contributions under these proposals would have totalled \$400 million in the first year. The Administration felt it could not support the full "package", but did propose substantial additional support for vocational education in its legislative recommendations.

The measure that finally won support from the powerful American Vocational Association was HR 4955 by Congressman Carl D. Perkins. This bill became law as the Vocational Education Act of 1963 and provided financial support as illustrated in the following chart:

### PERMANENT AUTHORIZATION

### FOUR-YEAR AUTHORIZATION

Work-study programs for	(1964-65	\$30 million
vocational education stu- dents	(1965-66	\$50 million
	(1966-67	\$35 million
Residential vocational education schools	(1967-68	\$35 million

The Vocational Education Act of 1963 dealt with, among other items, the following subject matter:

- I Categories of Persons Named as Eligible to Receive Vocational Education in Programs Established Under the Permanent Authorization.
  - A. High school students
  - B. Persons out of school but available for full-time study in

The Vocational Education Act of 1963, Catalog No. FS 5.280:80034. U.S. Department of Health, Education, and Welfare, Washington D.C., 1965

preparing for a job.

- C. Persons already in the labor market but who need retraining.
- D. Handicapped persons (academically, socio-economically) that cannot succeed in regular vocational education programs.

### II Construction of Area Schools.

- A. A specialized high school.
- B. A department of a high school training in no less than five different occupational fields.
- C. A technical or vocational school.
- D. A department or division of a junior college or community college training in no less than five different occupational fields.

### III Ancillary Services and Activities.

- A. Training and supervision.
- B. Program evaluation.
- C. Special demonstration and experimental programs.
- D. Development of instructional materials.
- E. State administration and leadership.
- IV Technical information re use and distribution of funds via state plans.
  - V Advisory Committee on Vocational Education.
    - A. Composed of Commissioner of Education (chairman); one representative each of the Departments of Commerce, Agriculture, and Labor; and twelve members appointed, for staggered terms, by the Commissioner with the approval of the Secretary of Health, Education, and Welfare.
    - B. Committee shall meet not less than twice a year to advise Commissioner of Education in the preparation of general regulations and with respect to policy matters arising in the administration of the Vocational Education Act.

### VI Advisory Council on Vocational Education.

- A. To be appointed during 1966 for the purpose of reviewing the administration of the vocational education programs.
- B. Twelve persons appointed by the Secretary of Health, Education, and Welfare shall report findings and recommendations to the Secretary not later than January 1, 1968.

### VII Work-Study Programs.

ERIC

- A. Student must have been accepted for enrollment as a full-time student in a vocational education program.
- B. Student must need earnings to stay in school.

C. Student must be at least fifteen years old and no more than twenty at the time of entry into program.

D. Student must be capable of maintaining good standing in his vocational education program while he is employed.

### VIII Residental Vocational Education Schools.

- A. Grants made available to State Boards, Colleges and Universities, and with the approval of the appropriate State Board, to public educational agencies, organizations, or institutions for the construction, equipment, and operation of residential schools to provide vocational education to youths at least fifteen years of age and less than twenty-one at time of enrollment.
- B. Special consideration given to needs of large urban areas having substantial drop-outs.

Other assistance for a type of vocational education was provided by the Economic Opportunity Act of 1964. In his State of the Union message to Congress in January, 1964, President Lyndon B. Johnson declared a "war on poverty," a war which was not only to attack poverty, but its causes. The President gave a special message on this theme in March, 1964, which was accompanied by a draft of a proposed Economic Opportunity Act. This proposal was introduced in bill form by Senator McNamara, supported by thirty-five other Senators. S2642 became Public Law 88-452.

Title I of the Economic Opportunity Act appropriated \$412,500,000 for the fiscal year ending June 30, 1965; and for the fiscal year ending June 30, 1966, and the fiscal year ending June 30, 1967. This title made the following provisions:

- Part A Established a Job Corps to provide education, work experience, and vocational training in conservation camps and residential training centers.
- Part B Established a work-training program under which the Director of the Office of Economic Opportunity will enter into agreements with State and local governments or non-profit organizations to pay part of the cost of full or part-time employment to enable young men and women, 16 to 21, to continue or resume their education or to increase their employability.
- Part C Established a work-study program under which the Director of OEO will enter into agreements with institutions of higher learning to pay part of the cost of part-time employment for undergraduate or graduate students from low-income families to permit them to enter upon or continue college level education.

ERIC

Other portions of the Economic Opportunity Act provide for "community action" programs, programs to combat poverty in rural areas, employment and investment incentives, and work-experience programs.

The whole theme of the Economic Opportunity Act of 1964 was that "education is the key to the prison of poverty." The act provides many opportunitites for enabling a wide diversity of groups and organizations to find ways of attacking poverty by getting at root causes, including education.

The Elementary and Secondary Education Act of 1965 also has significant implications for the pursuit of improved programs of vocational education. Title I amends Public Law 874 by adding a new Title II to the act to provide financial assistance in local educational agencies for the education of children of low-income areas, and by extending present provisions of PL 874 until June 30, 1968.

Title II of the act authorizes the Commissioner of Education to make grants for the acquisition of school library resources, textbooks, and other instructional materials for the use of children and teachers in public and private elementary and secondary schools.

Title III authorizes a five-year program for making grants for supplementary educational centers and services to stimulate and assist in the provision of vitally needed vocational services not available in a sufficient quantity and quality and to assist in the development of exemplary elementary and secondary school educational programs to serve as models for regular school programs.

Title IV amends the Cooperative Research Act of 1954 by authorizing the Commissioner of Education to make grants to universities and colleges and other public or private non-profit agencies, institutions, and organizations and to individuals, for research, surveys, and demonstrations in the field of education: for the dissemination of information derived from educational research; and to provide, by contracts or jointly financed cooperative arrangements, for the conduct of such activities. This title also provides for the construction and operation of regional facilities for educational research and related purposes.

Title V of the Elementary and Secondary Act of 1965 authorizes a program to stimulate and assist States in strengthening the leadership resources of their State educational agencies, and to assist those agencies in the establishment and improvement of programs to identify and meet the educational needs of States.

President Johnson's statement, issued April 1, 1965, the day the Elementary and Secondary Act of 1965 was reported by the subcommittee to the full Committee on Labor and Public Welfare, states clearly the philosophy that characterizes the interests of many leaders in estab-

<sup>188</sup>th Congress, 2nd Session, Senate Report No. 1218, Economic Opportunity Act of 1964, p 17.

lishing new aims and purposes for public education, with particular emphasis on vocational education. He said:

"This bill has a simple purpose: To improve the education of young Americans.

It will help them master the mysteries of their world - enrich their minds - and learn the skills of work.

And these tools can open the world to them.

With education, instead of being condemned to poverty and idleness, young Americans can learn the skills to find a job and provide for a family. Instead of boredom and frustration they can find excitement and pleasure in their hours of rest. Instead of squandering and wasting their talents they can learn to use them to benefit themselves and the country they live in.

How many young lives have been wasted; how many families now live in misery; how much talent has the Nation lost; because we have failed to give all our people a chance to learn.

Each day's delay in building an adequate education system means 2,700 school dropouts - 2,700 wasted and blighted lives. Last year over 28 per cent of all draftees were rejected by the armed services because they could not read or write at the eighth-grade level.

Today 8 million adult Americans have not finished 5 years of school - 20 millions have not finished 8 years of school - nearly 54 million have not finished high school.

This is a shocking waste of human resources. And we can measure the cost in other terms. We now spend about \$450 a year per child in our public schools. But we spend \$1,800 a year to keep a delinquent youth in a detention home - \$2,500 for a family on relief - \$3,500 a year for a criminal in a State prison.

Education is also the most economical investment in our Nation's future.

From the very beginning knowledge for all was the key to success of the American experiment. The duty to provide that knowledge has rested on each successive generation. It weighs most heavily on us. For as society has grown more intricate the need for learning has grown more intense. And the rapid growth of the Nation threatens to outdistance the capacities of the school systems we now have. The result is that millions of young Americans are denied their full right to develop their minds.

This bill represents a national determination that this shall no longer be true. Poverty will no longer be a bar to learning, and learning shall offer an escape from poverty. We will neither dissipate the skills of our people, nor deny them the fullness of a life informed by knowledge. And we will liberate 8

each young mind - in every part of this land - to reach to the furthest limits of thought and imagination.

For this truly is the key which can unlock the door to a great society."

### A SURVEY OF MAJOR CALIFORNIA EMPLOYERS

On September 14, 1964, four people of widely varying interests and backgrounds sat down to lunch in San Francisco and began a discussion concerning the relationship of the interests of business and industry to vocational education. Ralph'E. Boynton, Vice President of the Bank of America in charge of Personnel Training; Mrs. Marguerette Paponis, Employment Supervisor for the Pacific Telephone Company; Miss Lynn Steward, Assistant Training Director for Macy's California operation, joined William N. McGowan, Executive Secretary for the California Association of Secondary School Administrators, to discuss vocational education and the establishment of more meaningful relationships between business, industry, and the public schools.

Later the group was augmented to include Theodore J. Kirsch, District Personnel Representative for the Pacific Gas and Electric Company; Andrew J. Poulos, Manager, Personnel Administration, Lenkurt Electrical Company, Inc.; Donald J. Robertson, Manager, South-Western Publishing Company; and Gerald B. Schuyler, Executive Secretary for the Northern California Industry-Education Council.

A survey of major employers in California was decided upon to develop data concerning such items as: entry level jobs for which it is difficult to find employees, the general nature of interview questions, a forecast of job needs, and opinions concerning the kind of preparation schools should be giving students to improve their qualifications as potential employees. Other areas of interest were also made a part of the survey form. A list of the survey questions appears in Appendix #1.

### Respondents were:

Bank of America N. T. and S. A.
California Packing Corporation
Foremost Dairies, Inc.
Kaiser Steel Corporation
(General and Sales Offices)
Kaiser Steel Corporation
(Fontana Plant)
Kaiser Steel Corporation
(Fabricating Division, Napa)
Lockheed-California Company
North American Aviation, Inc.
Northrop Corporation
(Norair Division)
Pacific Telephone Company
Safeway Stores, Inc.

Some respondents could not answer all of the survey questions, for a variety of reasons - no records kept, information desired is classified, etc. However, the over-all response was excellent, and the data obtained most interesting.

Some random comments gleaned from material provided by the survey give a certain picture of the competition for jobs. The General Sales Offices of Kaiser Steel processed 302 job applicants during the year ending June, 1964, rejected 220, and hired 82. During the same period the Fontana Plant of Kaiser Steel processed 3,591 applicants, rejected 2,409, and hired 1,182. The Fabricating Division of Kaiser Steel processed 6,768, rejected 5,640, and hired 1, 128. Lockheed California processed 18,296 applicants and hired 3,944. The Pacific Telephone Company processed 200,000 job applicants, and hired 18,000.

Only Bank of America, Lockheed, and the Pacific Telephone Company have regular employees between the ages of 16-18: Bank of America - 92; Lockheed - 10; Pacific Telephone - 339.

Pacific Telephone employs the largest number of 18-20 year-olds - 6,084. Bank of America is next in line with 1,957. North American employs 1,700 18-20 year-olds, and the other companies all employ a few - from one up to approximately 300.

The above figures indicate fierce competition for jobs, the employment of highly selective processes for job applicant screening, and comparatively low employment of persons under the age of 20.

Chief among the reasons for rejecting job applicants are these:

- 1. Educational requirements could not be met. (Most employers require a high school diploma as basic qualification, higher degrees for specific types of job, and special training for special jobs, i.e., shorthand for certain types of secretarial jobs.)
- 2. Failure to meet minimum company test requirements. (Most companies use some form or other of objective test, either single test or a battery.)
- 3. Lack of skill or experience in jobs available.
- 4. Personal qualifications. (Attitude, appearance, personality, verbal expression.)
- 5. Physical and/or medical reasons.
- 6. Poor references.
- 7. Security reasons.
- 8. Unsatisfactory scholastic and/or attendance record in school.

It seemed important for the survey to find out the exact kind of information employers want from people applying for jobs; so job application forms were requested. They tell their own story, a very interesting story. Samples appear as Appendix #2. Certainly no young person should

graduate from high school without having had a chance to study several different types of application forms. Teachers could obtain a lot of good ideas for the building of course content from a study of these forms.

Young people should also be prepared for the "interview." Sample interview forms appear as Appendix #3.

Survey Item #6 stated: "List entry level jobs for which it has been difficult to find qualified applicants;" and Item #7 requested the same information as applied to the past two years (time period ending July 1, 1964). The following lists are self-explanatory.

### Item #6:

- Accountant
   Boilermaker (Read blueprints, Advanced Math)
- 3. Building Serviceman and Messenger (Telephone Co.)
- 4. Burners (Machine, Multi-Nozzle)
- 5. Clerk (Typist)
- 6. Code Welder
- 7. Draftsman (Semi-skilled)
- 8. Electrician (Maintenance, construction)
- 9. Engineering Trainees
- 10. Key Punch Operators
- 11. Machine Shop Operator
  (Milling, lathe, duplicating and profiling, boring)

- 12. Meat cutter
- 13. Mechanic (Production and maintenance)
- 14. Sales Trainees
- 15. Secretary (Male)
- 16. Service Representative (Telephone Co.)
- 17. Stenographer
- 18. Telephone Craftsman
- 19. Telephone Operator
- 20. Traffic Rate Analyst (Kaiser Steel)

### Item #7:

- 1. Accountant
- 2. Auditor
- 3. Blacksmith
- 4. Boilermaker
- 5. Building Service Man and Messenger (Telephone Co.)
- . 6. Burner
  - 7. Coremaker
  - 8. Draftsman
  - 9. Electrician (Maintenance)
- 10. Engineer (Design, Aeronautical, Sales)
- 11. Instrument Calibration
  Mechanic (Electronic)
- 12. Machinist (Journeyman, senior, numerically controlled, programmer)
- 13. Machine Tool Rebuilder and Repairman

- 14. Manufacturing Program Planner
- 15. Meat Cutter
- 16. Meter Repairman
- 17. Plastic Parts Fabricator
- 18. Plumber (Maintenance)
- 19. Programmer (Data Processing)
- 20. Roofer
- 21. Sales Trainees
- 22. Secretary
- 23. Sheet Metal Worker
- 24. Stenographer
- 25. Telephone Craftsman
- 26. Telephone Operator
- 27. Template Maker
- 28. Welder (Code and Combination)

The survey made a request that respondents forecast job needs for high school graduates, and other categories, over a period running through 1967. Forecasting is always difficult, and the form of the request was not as well developed as it might have been. However, responses supported what is known to be as a trend in the direction of higher educational qualifications for all sorts of jobs.

The Lockheed-California Company made an excellent response to the forecast request, and their response is quoted below.

	High School Graduates	Some College Education	College <u>Graduates</u>	Advanced Degrees
Salaried - supervisor Salaried - staff Engineering and	У	64 127	191 382	64 127
scientific Technical & office Skilled factory Semi-skilled factory Unskilled	574 932 1036 53	96 239 358 344	287 143 143	96
Salaried-supervisory Salaried - staff Engineering & scientif Technical & office Skilled factory Semi-skilled factory Unskilled	fic 556 912 1003 50	47 96 75 315 391 352	202 411 275 178 145	66 135 150
Salaried - supervisory Salaried - staff Engineering & scientif Technical & office Skilled factory Semi-skilled factory Unskilled	•	31 65 52 356 424 360	212 442 262 207 146	69 143 210

Testing has become a part of our "way of life," and is certainly an important part of employment experience. Actual testing programs employed by companies to help screen job applicants are many and varied. They check factors including: general intelligence, aptitudes, interests, personality, achievement, and many skills. The testing program varies from a single five minute test to the use of the General Aptitude Test Battery developed and used by the U. S. Department of Employment.

Companies vary as to requirements established for entry-level jobs. Major requirements seem to be:

- 1. Acceptable attendance record (work and school).
- 2. Acceptable behavior record.

- 3. Acceptable past employment record.
- 4. Career interests.
- 5. Eighteen years of age.
- 6. High School diploma or equivalent.
- 7. Minimum scores on tests.
- 8. Personal qualifications.
- 9. Physical requirements.
- 10. Requisite skills for specific jobs.

Again, the Lockheed-California Company provided a most comprehensive response. It is quoted here for its definite interest value. Karl R. Kunze, Department Manager, Training and Management Personnel, was the respondent.

There are several groups of minimum requirements for entrylevel jobs based on the complexity of the jobs. These follow in order of job complexity.

### Group I

- 1. Read and understand simple instructions.
- 2. Write minimum ability.
- 3. Add and subtract little more.
- 4. Some inplant training.

### Group II

- 1. Eighth grade education (average intelligence).
- 2. Add, subtract, multiply, and divide.
- 3. Minimum course in blueprint reading (basic).
- 4. Six weeks course in use of hand tools, i.e., pliers, screwdriver, scale, hammer, etc.

### Group III

- 1. Tenth grade education (average intelligence).
- 2. Course in blueprint reading.
- 3. Good knowledge and some power hand tools, i.e., drill, pedestal grinder, saw, etc.

### Group IV

- 1. Tenth grade education (average intelligence).
- 2. Good knowledge of blueprint reading.
- 3. Good knowledge of use of hand and power tools.
- 4. Good to excellent coordination.
- 5. Three to six months specialized training on the job.

The final item of the survey made this request of respondents: "State briefly your opinions concerning the kind of preparation (academic, personal, social) you feel the schools should be giving students to improve their qualifications as potential employees." A composite of

ERIC

responses made identifies the following areas of interest and concern:

- 1. There needs to be improved preparation for secretarial and clerical work (insufficient knowledge of grammar, spelling, simple mathematics, typing and shorthand.)
- 2. There needs to be improved grounding in arithmetic, grammar and spelling for everyone.
- 3. Students should be taught how to act in a business office, how to dress, and that "good results will be expected and required of them by their employers."
- 4. Students should be counseled on how to apply for work, job interviews, personal hygiene, courtesy, and employer-employee relationships.
- 5. Students should be "directed toward a field or vocation which is reasonable in terms of their individual skills, aptitudes and abilities."
- 6. There needs to be improved and more realistic counseling 1) outlook for employment in various vocations and industries,
  2) nature of preparation required, and 3) wage rates.
- 7. There needs to be improved instruction in developing an analytical approach to solving problems.
- 8. There needs to be instruction in ability to work with others and acceptance of supervision.
- 9. There needs to be a little indoctrination in the art of makeup for girls - better ways to "dress to impress."

One company submitted this specific response:

- 1) Teaching more Business economics. Here the students should be exposed to basic concepts of our private enterprise system and the desirability of businesses operating at a reasonable profit.
- 2) Encouraging student participation in Junior Achievement Programs.
- 3) In math courses, stressing the knowledge of business arithmetic.
- 4) Stressing the importance of spoken and written English in Business today.
- 5) Teaching the value of good grooming and dress.
- 6) Providing the students with more knowledge of "What To Do When Applying For A Job."

### MORE INFORMATION

It isn't enough to obtain cursory information from employers to provide the best informational background for vocational education, or to establish more meaningful communication between business, industry and the public schools. Much more needs to be done. A program for the establishment of continuing communications between these entities needs to be developed. Unions need to be involved. Vocational counseling needs to be reorganized and emphasized. Work experience opportunities for students need to be expanded. New points of view regarding vocational education need to be explored and studied.

In order to stimulate further thinking on this subject, three suggestions are made in the following material that are worthy of serious consideration and support. The first two suggestions are made by Ralph E. Boynton, Vice President in charge of Personnel Training, Bank of America. The third suggestion is the author's.

### Suggestion #1

### The problem:

There is not enough vocational information available at the school, and the counselor lacks time, knowledge of sources and facilities to obtain it. The material for vocational guidance which is on hand in the school for use in vocational counseling may be out of date or improperly prepared, and the counselor has no means for determining its reliability.

### The solution:

A clearing house for materials to be used in vocational guidance should be established by state governments in the office of the state superintendent of schools or his equivalent. The responsibility of this agency should be

- 1. The regular, orderly collection of information to be used in vocational guidance.
- 2. A review and evaluation of guidance material collected.
- 3. A regular planned distribution of guidance materials collected to school vocational counselors in the state and the distribution, on a regular basis, of a destruction schedule for information previously distributed and obsolete.

The Federal Government should assist in developing the system described by presenting a formalized plan for its implementation to the various state school authorities.

### Suggestion #2

### The problem:

Our present concept of the work of the vocational counselor in a typical school is not only erroneous, but is not within the capability of human performance. The counselor is expected to be skilled in evaluating the intelligence, the aptitudes and the interests of individual students. He must then fit the sum of his discoveries into an occupational objective that can be translated to the person being counseled. Modern testing and interviewing techniques provide the means for evaluation. The second step of matching the evaluation to a vocational objective should be performed by a computer and not by a person.

One large California corporation with nearly 30,000 employees has more than 2,000 classified positions. A large staff in the personnel department of this company is constantly servicing the position evaluation and classification system, in order to keep it up to date. It is possible that a counselor could learn about most of the positions in this company and perhaps even keep up to date on significant changes that would occur. It is not possible that a counselor can learn enough about all of the occupations in a world of increasing complexity and accelerating change.

It may be possible at some time in the distant future to provide the counselor with a computer to assist in selecting vocational objectives, but at the moment we must find effective human substitutes to help in the prevention of the waste of human efforts.

### The solution:

The school vocational counselor should become the school coordinator of vocational counseling.

- 1. He would first make a macro sort of students in terms of abilities and interests.
- 2. Then he would plan, over the total school year, a series of visits to the school by representatives of the community of work.
  - a. Students would be brought together in groups of not more than ten individuals.
  - b. A representative of the professions, of business, of industry, of labor, or of government would then present a brief description from a formal outline of what he does, how he does it, and what he needed to learn how to do it. Students would be given opportunities to ask questions and, subsequently, to meet with the resource person on an individual prescheduled basis.

- 3. The Federal Government should assist in the implementation of this program by:
  - a. Organizing a typical plan for a school.
  - b. Assisting in setting up demonstration systems in schools in strategic locations nationwide.
- 4. This same program could be installed in counseling centers being established in connection with the war on poverty and ignorance.

### Suggestion #3

Every County Superintendent of Schools should establish a Vocational Education Council composed of representatives from business, industry, and labor. The size of the Council will vary in different localities. The composition of the Council will also vary in different communities. The chief requisite for Council membership is that it represent major employers in the county and those who represent organized labor in the county.

The County Superintendent should provide a staff to assist the Council in its work, which, in broad outline, would be the following:

- 1. Maintain an up-to-date survey of job opportunities in the county that might take the form used by the Stanislaus County "Guide To Occupational Information in Stanislaus, San Joaquin, and Contiguous Counties."1
- 2. Assist schools in obtaining representatives from business, industry, labor, and government to help in vocational counseling.
- 3. Develop and maintain a County Clearing House for materials to be used in vocational guidance.
- 4. Assist the County Superintendent in the development of a voluntary program of supervision and evaluation of vocational education programs in the schools.
- 5. Assist local schools in establishing and maintaining work experience programs.
- 6. Assist in the coordination of efforts at the local, state, and Federal level of government related to vocational education and employment programs.

<sup>1 &</sup>quot;A Guide to Occupational Information in Stanislaus, San Joaquin and Continguous Counties," Project Search; distribution by Fred C. Beyer, County Superintendent of Schools, Stanislaus County.

### Conclusion

Public schools need to establish more meaningful contacts with the business community, and with labor, if the vocational education program is to become a real and practical, vital experience in preparing young people to take their proper places in the adult world following graduation from high school. The business community is ready to help establish these "more meaningful" contacts. Labor, when asked, has indicated a willingness to participate in a program to improve vocational education. It's up to school people now to move out into the community and recruit the assistance needed. It's up to school people to offer the opportunity to business, industry, and labor for involvement in the development of a truly "vocational" education program.

This is the real challenge facing the public secondary school today. The schools need to continue to improve the academic program for college prep students. But more, the schools need to establish a whole new academic program geared to the needs of those students who must have practical vocational preparation in secondary school if they are to have any such preparation at all. These students need Business English, Business Math, General Science, good Vocational Counseling, and Work Experience. Parents need counseling, too, in order to appreciate and understand their children's aptitudes, interests, and needs.

This is a large order for the public schools, but it's an order that must be filled. If the schools cannot accomplish this task, other agencies will be authorized, or created to do it. The public secondary school must now successfully meet the challenge of becoming truly "comprehensive," or evolve to a function and status that is less than the dream toward which its aims have directed it.

The Survey Form requested information as follows:

- 1. Number of job applicants processed in California from July 1, 1963 to June 30, 1964.
- 2. Number of persons hired during the above period. Number persons rejected.
- 3. List major reasons for rejections.
- 4. How many present employees are: (16-18 years old) (18-20 years old)?
- 5. Please enclose a copy (or copies) of your job application form (s). If you use an applicant interview form, please enclose a copy.
- 6. List entry level jobs for which it has been difficult to find qualified applicants.
- 7. List jobs for which it has been difficult to find qualified applicants during the past two years.
- 8. If no standardized interview form is used, describe the general nature and objectives of this employment interview.
- 9. Forecast job needs by title under indicated category:

	High School Graduates	Some College Education	College Graduates	Advanced Degrees
1965				
1966			·	
1967				

- 10. If pre-employment tests are given, please send sample set(s). If not available, please describe general nature of tests, indicating major areas covered in testing programs.
- 11. Please provide a statement of your minimum requirements for entry-level jobs.
- 12. State briefly your opinions concerning the kind of preparation (academic, personal, social) you feel the schools should be giving students to improve their qualifications as potential employees.
